TOPIC 01 · OWNERSHIP

Who owns this AI thing?

Not quite platform. Not quite security. Not quite ML. If everyone owns it, does anyone?

TOPIC 02 · QUALITY & EVALUATION

What is the SLO for an agent?

Fast. Available. Cheap. And completely wrong.

TOPIC 03 · SECURITY & CONTROL

Did we stop it, or just watch it happen?

Observability gives us evidence. But evidence isn't a boundary.

TOPIC 04 · OBSERVABILITY & STANDARDS

Can we reconstruct what the agent did?

Agents. Models. Tools. Evaluations. Do we have enough evidence to connect the dots?

TOPIC 04 · OBSERVABILITY & STANDARDS

Can we reconstruct what the agent did?

Agents. Models. Tools. Evaluations. Do we have enough evidence to connect the dots?

KubeCon CloudNativeCon North America 2026

TOPIC 05 · PRACTICAL TAKEAWAY

Monday morning. What do you build first?

One platform team. Limited time. Where do you invest first?
